LOMOND, ALBERTA, FRIDAY, AUG. 6. 1920

\$1.00 PER YEAR.

Lomond's Fair Was a Good Fair

Crowd Goes in for Aviation
Like Ducks for Water.

RECORD ATT'ND'NCE

The fourth annual exhibition of the Lomond Agricultural Society was met by the largest gate receipts yet enjoyed. In spite of four years of adversity on the part of the great majority of the people they were ready and willing to take hold and help make the fair a success.

From the standpoint of exhibits it must be admitted that in most departments this year fell a trifle short. The horses were thinner and other stock likewise. It is very hard to fit stock for exhibition purposes unless there is plenty of feed available, so we can hope for a return of better conditions when another year comes around. Inside the hall the ladies work was a trifle lacking but nevertheless there was an exceptionally good showing in this department. But, when it came to vegetables and cooking, more room than usual had to be allotted to these departments. It

was remarkable to see some of the garden products and they opened the eyes of some people to what can be accomplished when one sets out to do it. There was exceptionally heavy competition in the bread and it was no small problem for the judges to choose out of the numerous exhibits which should be accorded highest merit. The dairy exhibits were up to the standard, but it will be necessary for the board of directors to provide ice in future if they really desire to encourage this branch of domestic enterprise. There were very satisfactory showings in fruits and preserves as well as horticultural and art classes. The juvenile classes were also deserving of considerable attention.

The machine agencies took advantage of the occasion to arrange interesting exhibits.

Among the judges were Mr. Durno of Calgary on livestock, H. W. Reeves, R. Dawson, Mrs. Lindsay, Mrs. McCutcheon and Miss Cole, of Vulcan on inside exhibits, while D. S. Doane of Vulcan judged the poultry.

Perhaps the greatest attraction of the day was Capt. McCall and his aeroplane. For most of the people it was probably the first time an aeroplane had been within their range of vision. Considerable anxiety was evinced along towards noon when the machine had not made an early appearance, but the directorate had been assured the night previous that there would be no hitch

in the arrangements. About half past twelve a cry arose from the crowd and the machine was seen to be idling in the northwest, apparently looking things over with the view to selecting a landing place. After circling around the grounds a few times a favorable spot was chosen in Maronda's field and the crowd immediately stampeded forthwith. After securing a few drums of gas from Bobbie, the passenger flights began, O.C. Barber going up first. We understand twenty-six passengers were taken up before machine left for Calgary about six-thirty. We experienced our first sensation in air navigation. While we hardly encourage the reckless expenditure of money on ten dollar trips of such short duration, it is money well spent to one who desires to get acquainted with the attainments of the world's most recent scientific achievements.

The large crowd was fortunate in being able to witness two of the best ball games ever played in Lomond. Gleichen, Milo and the home team were on the slate for the \$100 purse. Milo came along shy a few players but with a little rustling from outsiders they made a formidable line-up. Gleichen won the bye in the draw, so Milo and Lomond went at it. Milo gained a lead of one in the first innings and held it till the last half of the ninth, when Chapman started a batting route and three runs were brought in. This was all that saved the bacon for the local

team and everyone had concluded that the odds were too close to speculate on. The second game was all Lomond's way and was very tightly contested. Siler from Champion was secured to pitch the final game and held the Gleichen fellows down pretty tight. The field work was particularly brilliant and very few errors were seen. Time and again the bases were filled by both sides and yet a calamity was always averted. Gleichen was whitewashed by six runs, thus giving Lomond the entire purse for the day.

The juvenile ball team opened the day by playing a game against Yetwood, suffering defeat in a very serious score.

The horse races were not so closely contested as might have been expected. Jack McKay undertook to lift the money but fell before the Ruggles pony in the free-for-all. Jay Little cleaned up in the novelty race, while Jessie Newton won the harness, hitch and drive half mile.

There was one department that deserved more attention than was accorded it by the exhibiting public. That same was poultry. It appears that it is next to impossible to awaken any public sentiment in relation to the importance of farm fowl. There should have been three hundred birds in the show ring instead of the paltry showing made. Perhaps with the start now made and with the co-operation of the Department of Agriculture another year will see considerable improvement.

It would hardly do to pass the day without mentioning the work of the band. The regular players were augmented by a couple of men from Vulcan, W. J. Orr of Enchant and Mr. Wills, on the trombone, from Bow City.

No untoward accident marred the day and booze that was consumed was well carried in most instances.

The G.W.V.A. met with considerable success at their dance in the hall after the fair. Dancing was carried on till midnight with a large crowd in attendance.

Dad Cox had a monopoly on the refreshments and his booth was the busiest spot in town. He succeeded in disposing about everything he could get hold of.

LOCALETS

Chas. Klein has gone on to Vancouver to take in the sights.

o o o

Paul Sokvitne is running a Vulcan stage route while Dad Cox is away.

Fight Down the Weeds

The cardinal point in farming at the present time is weed control. To kill the weed before the seed matures is all important. This work requires the use of efficient machinery. The Massey-Harris Company are undoubtedly specialists in building cultivation machinery. Study their theory of construction before buying.

W. A. Teskey - Lomond and Travers

LOCALETS

E. E. Saunders has leased his farm to Messrs. Shick and Adler and is moving out next week to Kathryn, Alberta.

Dad Damery is endeavoring to renew his amorous youth and has purchased himself a car. It is rumored he has designs against Johnny Holo.

Jack McKay is about the most self-satisfied man in the Lomond district, having again won the heavy draft team championship. This year's winnings make eight first prizes the team has won for him. Jack is thinking of going to Vulcan if their list looks flush enough for him.

Wm. Hesketh has purchased a fine team of bays from S.P. Johnson and started in the dray work.

The Ficht, McIntosh and Thompson Wilkinson threshing outfits are threshing rye crops this week. Other machines are reported to be working in the district.

SAFETY DEPOSIT BOXES are now installed at this Branch for the custody of valuable papers, etc., affording safety and privacy. Further information supplied by the Manager. Boxes rented for \$3.00 and upwards, per annum.

AULTMAN-TAYLOR

New Century Threshers

**FOUR SIZES
All Standard**

The Thresher That Sends All The Grain Into The Bag

MILLIONS of dollars are wasted in threshing each year in the form of grain which is fed into the separator but never reaches the bag--grain that works through to the stacker and is blown out with the straw. This is a necessary evil with the old vibrator type of thresher--but not with the Aultman-Taylor New Century.

The Aultman-Taylor New Century Thresher, equipped with the Universal Rotary Straw Rack device and Inclined Open Web, stop this loss. *They thresh and save all the grain.*

Universal Rotary Rack

The Universal Rotary Rack positively gets all the grain out of the straw. Its rotary action gives it double the agitation of the vibrating rack, hence double separating capacity. It moves the straw rearward in a continuous thin stream, insuring perfect separation and greater capacity. And at the same time, it saves power and stops vibration.

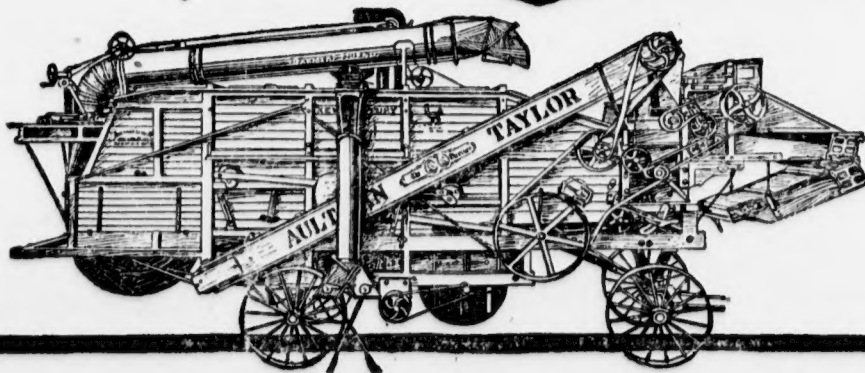

Four Sizes--All Standard

Aultman-Taylor Threshers are made in four sizes, all absolutely standard in design and construction. *The sole difference between the largest and smallest New Century Thresher is one of size only.* Our two smaller threshers are the ideal size for individual use with the small tractor.

We will be glad to give you any further information along this line at any time. Come in and talk it over with us now.

NOTES

Like a malicious disease the idea of irrigation is spreading over Western Canada. Perhaps it might be considered poor rhetoric to connect up the subject of irrigation with a malicious disease, for from irrigation it is hoped to bring relief, not suffering. Forgive our synonyms and on to the question. It has again been demonstrated that to be solely dependent upon natural precipitation is a hazardous business proposition in many sections of Western Canada. As far as rainfall is concerned South Alberta was more favored this year than some parts of Saskatchewan and Manitoba, only we had a myriad of other pests to contend with; so it is not to be wondered at that Saskatchewan is starting an agitation for preliminary surveys on possible irrigation projects.

While the actual wildfire in connection with the Lethbridge Northern appears to have quieted down, it must not for a moment be considered as a dead issue. Much to the contrary. It is to the point now where the provincial and federal authorities have condescended to confer informally in an endeavor to find a solution to the financial end of the problem.

o o o

This hot dry weather of the past month or so has been hard on the reputation of the local butter-makers. It is no easy task to make and keep sweet dairy butter in hot weather, even when one has an abundance of spring water available; and, as everyone knows, spring water is about as abundant as the editor's finances. We are prepared to be generous towards all dairy maids in the face of present conditions, but we don't enjoy eating some of the butter we buy which turns out to be as strong as Samson.

o o o

We have never seen weeds so profuse in variety and rank in growth as around here this season. Most of the farmers can barely keep pace with the growth on their summerfallow. It might be consoling to read that the government bug men predict the second visit of the

beet webworm about August twentieth and in such numbers as to consume all the Bolshevik thistles in Southern Alberta that are still showing green. We hold no brief for the thistles but know right well if the worms come back again our chances for sauerkraut will be na-poo.

o o o

One often wonders if H. H. Haladay ever realizes any responsibility in respect to his office as federal representative of the Bow River constituency. Looking from the standpoint of the southern part of the riding he has been nothing more nor less than an annual burden of four thousand dollars on this war-debt ridden dominion of ours. To cite a specific instance for his attention, may we refer to the control of the cutworm epidemic. Further than the fact that a government entomologist drove through the district one Sunday and then wrote a letter back saying that he considered this one of the worst infected districts, nothing

has been forthcoming in the way of assistance towards preventing an outbreak another year. As to the conduct of the said gentleman during the session at Ottawa, we have every reason to believe he does whatever he is told to do by those in the Seats of the Mighty.

o o o

Since the abolition of wheat control the wheat market ap-

pears to be all shot to pieces. To the inexperienced like ourselves it looks as if the grain men are getting ready to shear we lambs of the prairies. It is not yet too late to have a return of the Wheat Board but the people must give voice to a much louder appeal.

o o o

We'll never get through appreciating rain storms.

pression and it looks as if the majority are being agitated on the grounds of century old racial grievances. Just suppose the German-Irish alliance had been effected during the war, as was the endeavor of, Sinn Fein agitators, would not Ireland now be under similar oppression to Germany and Austria? We have read numerous speeches by Irish propagandists and they appear too shallow to receive much outside consideration. When this old world needs peaceful times so badly it doesn't look very consistent for the Irish to be stirring up trouble and strife.

o o o

The Bolsheviks are sure hammering Poland to pieces, and it looks if Great Britain and France will have to step in to save their own skins. To us the Bolshevik army is nothing less than Germany fighting under false colors. The Poles have undoubtedly been ill advised in opening up and carrying on the campaign but there is no reason why they should suffer alone for the benefit of the entire Western Europe.

ASSOCIATED FARMERS, LTD.

O. C. BARBER, Manager,

Glander Outbreak Serious Affair

Lomond district is laboring under the cloud of a probable glander epidemic. At the time of the cattle dipping Salter and the Kennay boys noticing some of their horses suffering from some affliction called in Dr. McMillan, who was inspecting the dipping work at Hardwick's ranch. At the time the veterinary suspected that the disease was glanders and immediately placed the bunch under quarantine. After undergoing the serum test it was found that sixteen head reacted to true glanders, and were ordered destroyed. Several of these horses were brought down from Gleichen this spring and it was thought that the animals had suffered exposure before coming here. Among the lot of animals destroyed were a number of fine work horses, which in spite of the two-thirds compensation provided by the government, means a great loss to the owners. Chief veterinary inspector Hargreaves of Medicine Hat is now in charge of the situation and has his representatives working through the district in an attempt to stamp out the disease before it becomes general.

The Armada U. F. A. is holding an ice cream social in their hall on Friday evening, Aug. 13th, to which a general invitation is extended to the public.

The Sunny Plains school board has voted sufficient funds to bring the bounty in the gopher contest up to one cent per head.

Government Crop Report

Crop conditions in Alberta continue to improve. For some days previous to the report of July 15th. and for one week following very warm weather prevailed over the whole of the province. This was highly beneficial in view of the heavy rains of spring, and late seeding. The crop made very rapid progress during this warm spell. Three weeks of hot weather began to tell on barley crops and held back late oats but the dry weather was relieved practically all over the province on July 21st. by rain varying from over half an inch to an inch and a half. Following this there have been good showers of smaller spread but numerous and well distributed over the province.

The situation with respect to the various grain crops, is now good. Wheat was not held back by the protracted heat spell and is now in head everywhere, and cutting will begin in three weeks. The spring wheat will come in with a rush and there will be very little belated crop. Wheat, in fact, is the best crop in the country just now as it is good every place except on fields in Southern Alberta where it has been stubbled in on unclean land not properly prepared last year. The yield will be considerably higher than it has been for at least four years and this applies to every part of Alberta. The yield cannot fall below twenty-two or twenty-three bushels and with one or two light showers to keep growing and filling active it may pass the twenty-five bushel mark. Most of the wheat stands well up to three feet high and above in some cases. The grain is hot very long in the Peace River country but is making steady improvement. There will be forty-five bushel crops threshed in some fields in Southern Alberta. The wheat crop of twelve thousand acres on the Noble Foundation is uniformly good.

Harvest Coming in With a Jump

Lomond harvest operations have already commenced. Threshing of rye is being done this week and most of the crop is being sold from the field for local seed purposes. Wheat cutting will be fairly general next week on the early seeded patches. It is quite encouraging to see the machine agencies again putting out binders and twine.

E. and S. M. Colwell are the earliest wheat cutters reported, they having commenced on Wednesday. Harry Rickett started cutting today just over the railway tracks.

Tenders Wanted

LOMOND CONSOLIDATED SCHOOL DISTRICT, NO. 20

Tenders will be received by the undersigned up till Friday, Aug. 20, 1920, for the driving of the school vans in the four divisions of the Lomond Consolidated School District, No. 127, viz: Dufferin, Deepwater, Ocean Wave and Rolling Prairie. A separate vehicle to be provided for each division. Successful tenderers will be required to furnish bonds of indemnity. The lowest or any tender not necessarily accepted.

ANDREW W. TULLOCH,
Secretary-Treasurer

TENDERS WANTED

Tenders will be received for the erection of a fence around the village nuisance grounds situated on the S. E. corner of the N. E. quarter of 11-16-20, tender to supply all material and labor. Tenders will close at noon on Monday, Aug. 16th. Further particulars and specifications may be obtained from the undersigned.

ANDREW W. TULLOCH,
Secretary.

Harvest Specials

We are arranging to give special values on bulk grocery orders on harvest and thresher supplies. If a careful business farmer this offer will surely appeal to you. The money you can save in this manner will mean just as much to you as the sale of so many more bushels of wheat. So, you see, town farming frequently does pay and pay you well.
